

Amendments to the Claims:

This listing of claims will replace all prior versions, and listings, of claims in the application:

Listing of Claims:

1-35. (canceled)

36. (currently amended) Method of sending a call relevance flag with a call for use in alerting a called party, the method comprising:

selecting, by a calling party, at least one call relevance flag for use in alerting a called party of a phone call, the at least one relevance flag indicating a mood of the calling party,

setting up a voice connection to a called party phone, and

transmitting said at least one call relevance flag to the called party phone during the setting up of the voice connection, such that the call relevance flag can be used for selecting a manner of alerting the called party of the phone call provided over the voice connection.

37. (currently amended) Method according to claim 36, ~~wherein~~ where the flag is transmitted during a signaling phase for setting up the connection.

38-40. (canceled)

41. (currently amended) Method according to claim ~~[[40]]~~ 36, ~~wherein~~ where the mood is a mood in a group including angry, sad, happy, content, nervous, anxious, and scared.

42. (previously presented) Method according to claim 36, further comprising:
selecting at least one media object for use in alerting the called party, and
transmitting the at least one media object to the called party phone during the
setting up of the voice connection, such that the called party can use the media object when being
alerted about the phone call provided over the connection.

43. (currently amended) Portable communication device for sending a call relevance
flag with a call for use in alerting a called party, the portable communication device comprising:
a control unit ~~arranged~~ to receive a selection by a user of at least one call
relevance flag to be used in selecting a manner of alerting a called party of a phone call, the call
relevance flag indicating a mood of the user, and
a communication unit ~~arranged~~ to:
set up a voice connection to a called party phone, and
transmit the call relevance flag to the called party phone during the setting
up of the voice connection.

44. (currently amended) Portable communication device according to claim 43,
~~wherein where~~ the communication unit is ~~arranged~~ to transmit the call relevance flag during a
signaling phase for setting up the connection.

45-47. (canceled)

48. (currently amended) Portable communication device according to claim [[47]] 43,
~~wherein~~ where the mood is a mood in a group including angry, sad, happy, content, nervous,
anxious, and scared.

49. (currently amended) Portable communication device according to claim 43,
~~wherein~~ where the control unit is further ~~arranged~~ to select at least one media object for use in
alerting a called party of a phone call and provide the media object for transmission to a called
party phone, and

where the communication unit is ~~arranged~~ to transmit the media object to the
called party phone during the setting up of the voice connection.

50. (currently amended) Portable communication device according to claim 43,
~~wherein~~ where the portable communication device includes a cellular phone.

51. (currently amended) A ~~computer program product comprising a computer~~
readable medium, having storing thereon computer program code ~~means~~, to make a portable
communication device perform, when said computer program code is ~~loaded in~~ executed by the
portable communication device, a method comprising:

selecting, by a calling party, at least one call relevance flag for use in alerting a
called party of a phone call, the at least one call relevance flag indicating a mood of the calling
party,

requesting a setting up of a voice connection to a called party phone, and

transmitting said at least one call relevance flag to the called party phone during the setting up of the voice connection, the call relevance flag being used for selecting a manner of alerting the called party of the phone call provided over the voice connection.

52. (currently amended) A computer ~~program element~~ readable medium comprising: computer program code ~~means~~ to make a portable communication device perform, when said computer program element code is ~~loaded in~~ executed by the portable communication device, a method comprising:

selecting, by a calling party, at least one call relevance flag for use in alerting a called party of a phone call, the at least one call relevance flag indicating a mood of the calling party, and

at least order the setting up a voice connection to a called party phone and transmission of said at least one call relevance flag to the called party phone during the setting up of the voice connection, such that the call relevance flag can be used for selecting a manner of alerting the called party of the phone call provided over the voice connection.

53. (currently amended) Method of using a call relevance flag received in relation to a call, the method comprising:

receiving a call relevance flag from a calling party phone during a set up of a voice connection, the call relevance flag corresponding to a mood of the calling party,

selecting a manner of alerting a called party based on the call relevance flag, and alerting the called party about the call in the selected manner.

54. (currently amended) Method according to claim 53, ~~wherein~~ where the call relevance flag is received during a signaling phase for setting up the connection.

55. (currently amended) Method according to claim 53, ~~wherein~~ where the selecting comprises:

selecting at least one media object corresponding to the call relevance flag, and

~~wherein~~ where the alerting comprises:

using the media object for alerting the called party.

56. (currently amended) Method according to claim 55, ~~wherein~~ where said at least one media object includes a ring tone, and

~~wherein~~ where the alerting comprises using the ring tone for alerting the called party.

57. (currently amended) Method according to claim 55, ~~wherein~~ where said at least one media object includes a piece of text, and

~~wherein~~ where the alerting comprises displaying that text when alerting the called party.

58. (currently amended) Method according to claim 55, ~~wherein~~ where said at least one media object includes an image, and

~~wherein~~ where the alerting comprises displaying the image when alerting the called party.

59. (canceled)

60. (canceled)

61. (currently amended) Method according to claim 53, ~~wherein~~ where the receiving comprises:

receiving a media object from the calling party phone during the set up of the voice connection, and

~~wherein~~ where the method further comprises:

alerting the called party using the media object.

62. (currently amended) Portable communication device for using a call relevance flag received in relation to a call, the portable communication device comprising:

a communication unit ~~arranged~~ to receive a call relevance flag from a ~~calling party~~ phone of a calling party during a set up of a voice connection, the call relevance flag corresponding to a mood of the calling party,

a control unit ~~arranged~~ to select a manner of alerting a called party based on the call relevance flag, and

at least one alerting unit ~~arranged~~ to alert the called party in the selected manner of a call being made via the voice connection.

63. (currently amended) Portable communication device according to claim 62, ~~wherein~~ where the communication unit is ~~arranged~~ to receive the call relevance flag during a signaling phase for setting up the voice connection.

64. (currently amended) Portable communication unit according to claim 62, ~~wherein~~ where the control unit, when selecting, is ~~arranged~~ to select at least one media object corresponding to the call relevance flag_a and

~~wherein~~ where the at least one alerting unit alerts the called party using the media object.

65. (currently amended) Portable communication unit according to claim 64, ~~wherein~~ where the alerting unit includes a display, a vibrator, a speaker, an earphone₁ or a microphone.

66. (currently amended) Portable communication device according to claim 64, ~~wherein~~ where said at least one media object includes a piece of text, and

~~wherein~~ where the at least one alerting unit includes a display that is ~~arranged~~ to display the text when alerting the called party.

67. (currently amended) Portable communication device according to claim 64, ~~wherein~~ where said at least one media object includes an image, and

~~wherein~~ where the at least one alerting unit includes a display that is ~~arranged~~ to display the image when alerting the called party.

68. (currently amended) Portable communication device according to claim 64,
~~wherein~~ where said at least one media object includes a ring tone, and
wherein where the at least one alerting unit comprises a speaker and a ring tone
generating unit ~~arranged~~ to use the ring tone for alerting the called party.

69. (canceled)

70. (canceled)

71. (currently amended) Portable communication device according to claim 62,
~~wherein~~ where the communication unit is further ~~arranged~~ to receive a media object from the
calling party phone during the set up of a voice connection, and
where the at least one alerting unit is further ~~arranged~~ to alert the called party of a
call being made via the voice connection using the received media object.

72. (currently amended) Portable communication device according to claim 62,
~~wherein~~ where the portable communication device includes a cellular phone.

73. (currently amended) A computer ~~program product comprising a computer~~
readable medium, having stored thereon computer program code ~~means~~, to make a portable
communication device perform, when said computer program code is ~~loaded in~~ executed by the
portable communication device, a method comprising:

receiving a call relevance flag from a ~~calling party~~ phone of a calling party during a set up of a voice connection, the call relevance flag corresponding to a mood of the calling party,

selecting a manner of alerting a called party of the call based on the call relevance flag, and

alerting the called party about the call in the selected manner.

74. (currently amended) A computer ~~program element~~ readable medium comprising: computer program code ~~means~~ to make a portable communication device perform, when said computer program element code is ~~loaded in~~ executed by the portable communication device, a method comprising:

receiving a call relevance flag from a ~~calling party~~ phone of a calling party during a set up of a voice connection, the call relevance flag corresponding to a mood of the calling party,

selecting manner of alerting a called party of a call based on the call relevance flag, and

alerting the called party about the call in the selected manner.
